WE ARE OPEN

Over the weekend Prime Minister Boris Johnson announced a second national lockdown due to the rising number of cases of Covid-19. However, Dr SW Clinics (as a healthcare and medical provider) will **REMAIN OPEN**.

In response to the updated regulations, we would like to inform you of the **COVID-19 policies** we are now operating at Dr SW Clinics, where we put your safety and well-being as our top priority.

As patient and practitioner safety remains of paramount importance to us, we have adapted our protocols under the PHE (Public Health England) guidelines. You can find more information below.

PRE-APPOINTMENT HEALTH CHECK

Patients will be requested to confirm that they are, or have been COVID-19 symptom free for 14 days prior to their appointment.

SAFETY MEASURES

As you enter the building you will need to use the alcohol disinfectant rub to disinfectant your hands.

We advise that you wear a mask at all times while inside the clinic and only remove your mask at the request of the clinical professional.

VIGOROUS DAILY CLEANING

We always carry out a robust cleaning routine daily and in-between each patient including steaming and sanitising the equipment.

FULL SET OF PPE FOR PRACTITIONERS

All our staff will wear a new set of PPE as per the PHE (Public Health England) guideline including face mask and face shields throughout each appointment in order to follow the highest standards of infection control.

DISINFECT

Please do not be concerned as we continue to maintain high standards of cross infection control. Stay safe and please contact us if you have any questions.

These precautions ensure optimal levels of patient safety and comply with the social-distancing, infection control, health and hygiene measures in place
